### EGCO 213 Programming Paradigms (T1/2019)

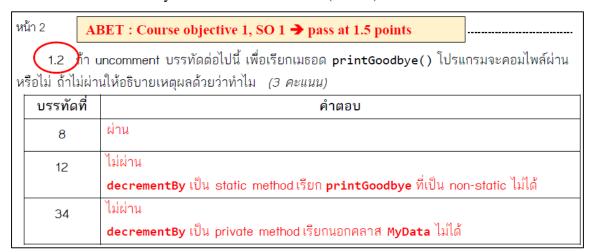

## SO 1 An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics

- PI 1.1 Identify and formulate engineering problems
- PI 1.2 Solve engineering problems by applying mathematics and engineering knowledge

#### Passing criterion >= 70%

#### PI 1.1 Identify and formulate engineering problems

### Assessment 1.1.1 Midterm exam: identify problems/errors in given programs Attainability = 28 out of 38 students (73.7%)

# Assessment 1.1.2 Final exam : identify concurrent behaviors of threads Attainability = 25 out of 38 students (65.8%)

1.3 ท้าตัดคำว่า synchronized ออกจากบรรทัดต่อไปนี้ ผลลัพธ์ของโปรแกรมจะเปลี่ยนไปจากเดิม หรือไม่ อย่างไร <i>(3 คะแนน)</i>					
บรรทัด	ผลลัพธ์เปลี่ยนหรือไม่เปลี่ยน (ถ้าเปลี่ยน เปลี่ยนอย่างไร)				
6	เปลี่ยน เธรดจะแย่งกัน update ค่าของตัวแปร sum ทำให้ผลลัพธ์ออกมาเละเทะ	(1) (1)			
24	ไม่เปลี่ยน (1)  ABET : Course objective 1, SO 1 → pass at 1.5 points				

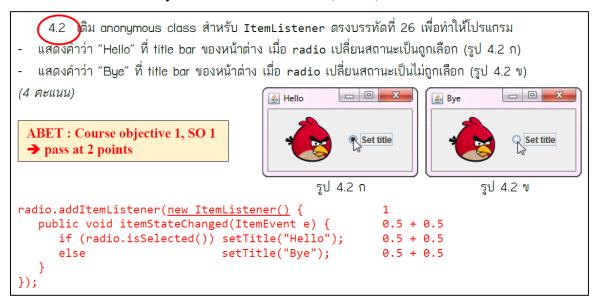

Average attainability = (73.7 + 65.8)/2 = 69.75%

Student performance

	Student ID	Assessment 1.1.1	Assessment 1.1.2
		Pass at 1.5 points	Pass at 1.5 points
1	6113054	1.5	3.0
2	6113055	2.0	0.0
3	6113057	2.0	3.0
4	6113058	2.0	3.0
5	6113059	3.0	3.0
6	6113060	0.5	1.0
7	6113062	3.0	0.0

37	6113295	2.0	2.5
38	6113296	2.0	3.0

#### PI 1.2 Solve engineering problems by applying mathematical and engineering knowledge

### Assessment 1.2.1 Final exam : write a short method to solve given problem Attainability = 26 out of 38 students (68.4%)

Assessment 1.2.2 Group project 1. Implement Java program to solve food delivery problem (pass at 7 out of 10 points)

Attainability = 34 out of 38 students (89.5%)

Average attainability = 78.95%

Student performance

	Student ID	Assessment 1.2.1	Assessment 1.2.2
		Pass at 2 points	Pass at 7 points
1	6113054	4.0	8.0
2	6113055	0.0	7.5
3	6113057	4.0	10.0
4	6113058	3.0	8.5
5	6113059	4.0	9.0
6	6113060	2.0	7.5
7	6113062	4.0	7.5
8	6113063	3.0	10.0
9	6113064	4.0	7.5
10	6113065	0.0	7.5
11	6113127	1.0	10.0
12	6113128	2.5	8.5
13	6113129	1.0	5.0
14	6113130	4.0	9.0
15	6113131	0.0	8.5
16	6113132	3.0	10.0
17	6113135	3.5	8.5
18	6113136	4.0	10.0
19	6113137	0.0	8.5
20	6113138	4.0	9.0
21	6113139	2.5	10.0
22	6113140	4.0	8.5
23	6113141	0.5	5.0
24	6113142	0.0	7.5
25	6113143	0.0	8.0
26	6113187	0.0	8.5
27	6113188	4.0	8.5
28	6113223	3.0	5.0
29	6113224	4.0	8.5
30	6113225	1.5	8.5
31	6113226	3.5	5.0
32	6113227	4.0	10.0
33	6113228	3.0	8.5
34	6113229	4.0	8.5
35	6113293	3.0	8.5
36	6113294	1.0	9.0
37	6113295	3.0	8.5
38	6113296	3.5	7.5

### **Summary**

	PΙ	Attainable	Reasons	Remedial Actions	Action Plan	Measurements
		(>= 70%)				
SO1	O1 1.1 Yes • Students do not fully understand race condition and synchronization between threads		More examples and exercises on multithreading	Next year	Next year	
	1.2	Yes	Students cannot write event	More focus on	Next year	Next year
			handlers in anonymous style	anonymous classes
